

DSC Warthog A-10C: a "Photo book"

Introduction:

At this time i am a "rookie" Mission Builder flying the -already fabulous-simulator: DCS Warthog A-10 C. I found it rather time-spending though always needing to bring up the "Encyclopedia" to see what i wanted to put on the map. Further more: firstly, some items of the Encyclopedia can't be put on the map (example : ATZ-60). Secondly, names in the "Ecyclopedia" are different than the names in the "Mission Editor". Thirdly: as a "rookie", i hadn't a clue what an "APC M 1025 HMMWV" or a "SAM SA6 KUB LN 2P25" looked like.

So i made this "Photo book" for quick reference. It is based on the "final release" version and meant for "rookies" like myself.

*It covers **ALL** items as shown in the "Mission Editor",**in the exact order and with their exact designation name** (except for "Weapons": see there)*

Feel free to print it, use it and share it with others, but only on a non-commercial basis.

I will take no responsibility though for possible errors in this "Photo book".

Kind regards, and a big thanks to ED and to all who made this simulator possible.

Tigertooo

In due time i am looking forward to join a "serious" online A-10 C Squadron or Wing.

OK, but first i'm off now to learn to fly this "monster" and to use all it's sophisticated systems.....

Belgium, february 2011
